*Clear Spray Gloss (*if using brush on acrylic paints)

Tools Needed

Medium Bristle Paint Brush (if using brush on acrylic paint)
Fine Tip Paint Brush
Sandpaper (optional)
Scissors
Crystal Katana or Wax Tip Crystal Applicator
Old Newspapers or Wax Paper (to protect work surface)

Techniques to Know

Basic Painting
Gluing Flatback Crystals

INSTRUCTIONS:

1. Paint the rim, sides, and bottom of the terra cotta plant pot; the rim, top and bottom of the plant saucer, and a large wood bead (w/small hole) with white primer paint. Allow the paint to dry.
2. Paint the rim, sides, and bottom of the terra cotta plant pot; the rim, top and bottom of the plant saucer; and the wood bead with red paint. Allow the

paint to dry. Repeat this step, allowing the paint to dry between coats, until paint color dries solid.

3. If you used brush on acrylic paint, spray all surfaces of the plant pot, plant saucer, and wood bead w/ spray gloss. Allow to dry.
4. Use E6000 glue to glue the point of the Swarovski cabochette pendant into the hole on one side of the wood bead. Allow glue to dry.
5. Use Swarovski crystal glue pen and the katana or wax tip crystal applicator to glue flat back crystals and sequins as desired on your painted plant pot and saucer lid. Allow glue to dry.
6. Turn the plant pot upside down. Use the fine tip paintbrush to paint three white snowflakes onto one side of the pot. Allow paint to dry.
7. Use the glue pen and katana or wax tip applicator to glue flatback crystals onto the snowflakes on the plant pot. Allow the glue to dry.
8. Use E6000 glue to glue the base of the clear glass bubble bowl to the bottom of the plant pot. Allow glue to dry.
9. Cut a 2' length of white ribbon. Just below the bubble bowl, tie the ribbon around the plant pot. Form a bow and trim the ribbon tails.
10. Fill the bubble bowl with colored wood beads and place saucer lid over the top. (Or, fill with holiday candy treats.)
11. Cut three 1 yd. lengths of red satin cord. Wrap the cords around fingers and tie into little bundles. Place the bundles into the dispenser. These can be used as cording for children to make wood beaded necklaces.

SKILL LEVEL: Advanced Beginner

APPROXIMATE TIME: 2Hr. + Drying Time
